Title: BIRDS OF BRITANNIA

Author: Brother Wayne

Bound here is the
comprehensive guide to
the avian species,
beautifully and colorfully
illustrated by many
different artists.

...Surprising to many is
that the Silver-Winged
Pharcelot is not the
most prevelent bird in
Britannia, though arguably
the most visible. Far
more popular is the
Black-Tipped Grackle, but
it's predilection for dark,
cool areas make is
considerable less visible.
